Mike Bechdol - Highlights/Accomplishments for FY12

Reviewed and responded to 260 SSA projects this calendar year, on track to do 350 + projects. Reviewed and responded to 10 + NEPA projects.

Created and provided Source Water Assessment training to staff of the New Mexico Environmental Finance Center. (This should save the Agency up to \$2000/year in travel expenses without causing harm to the Tribal Source Water Protection program.)

Collected Source Water Assessment data for three Tribes, input that data plus data from four more Tribes, that was collected by NM EFC, into the SWAP2K program.

The SWAP2K program was updated for all new software, MS Word 7, ArcGIS 10.1 and FoxPro. Since Windows 7.0 was installed Region wide, we are in the update process again. After updates are complete and the bugs are worked out, SWA reports for the seven NM Tribes will be completed and provided to the NM EFC and the Tribes.

Provided GIS help to the UIC and Drinking Water sections whenever needed. Projects where maps/data were provided:

created form/training on how to gather GPS data; Panola/Bethany maps; UEC maps, endangered domestic water wells near UEC; maps for all TX aquifer exemptions, map of water wells in Goliad County, TX; map of oil/gas and public/domestic water well sites near Arcadia; PWS water sampling locations map for Lagrange, TX; map of all Tribal water systems.

Responded and addressed all citizens' complaints/enquiries that my boss directed to me.
